Engineers Without Borders
Designing Sustainable Solutions

EWB-OSU is a humanitarian club made up of students in all types of majors who work closely with advisors at OSU and our EWB-USA mentors.

Our club partners with communities all over the world and works with them to get access to sustainable potable water.

We have come together as a club to empower others as they work towards obtaining their sustainable goals because we believe everyone should have the right to drinkable water.

*Engineers Without Borders USA builds a better world through engineering projects that empower communities to meet their basic human needs. Our highly skilled volunteers work with communities to find appropriate solutions for their infrastructure needs.*
The Nicaragua Program has been in a partnership with the small community of Los Potrerillos for about 5 years and began back in 2015 with an initial assessment trip of the community. Los Potrerillos consists of about 1,800 members that are split into three sections, El Alto, El Brasil, and El Bajo. Our program is water-based meaning that our overall goal is to design and create a safe, sustainable, and constant source water for community access.

Previous work with this project includes traveling to Nicaragua to drill a new well for water access and creating an efficient distribution system to different sections of the community. In 2019, there was a travel ban on the country due to civil unrest; in order to ensure the needs of the community, the Nicaragua Program remotely implemented two new 22,000L water storage tanks and a covered platform structure to protect them from the elements. Currently, the program is working towards designing a new river crossing to support two suspended pipes, assessing survey data to determine preexisting pipelines that need to be fixed and provide electrical components to ensure proper flow and regulation.

EWB-OSU Cambodia was established in early 2016. Since then, we have sent travel teams to O’rana in 2016, 2017, and 2019 to gather information, establish communication with the locals, and begin the implementation of a water filtration and distribution system.

The people of O’rana currently do not have readily available access to potable water and have to spend 20% of their income on importing unsustainable plastic water bottles. Our goal is to work with the community to provide clean drinking water to all 1000 community members and to further provide the opportunity for business and a source of income within the village.

This program is currently working on finalizing the design of the treatment and distribution system and preparing for a remote implementation in early 2021. They will be working with a local NGO, Rainwater Cambodia, to build a water tower and implement the treatment system. In 2021 the project will finalize the treatment process and implement piping to distribute the water to individual households.
We Need Your Help

In order to continue to work with and help these communities, we need your help. We are seeking partners to join us in support of the communities we work with. By partnering with us we can successfully complete the work we set out to do. Support from industry benefits the communities and allows the students to foster professional relationships.

Reasons to Consider Sponsorship

- **Recognition** as a leader in philanthropy and corporate responsibility.
- **Publicity** at EWB-OSU events.
- Opportunity to **invest in students’** professional development.
- Join a list of well-respected firms and organizations that support EWB-OSU.

Corporations Can Partner With us to Help With Two of Our Primary Needs

- **Financial Support**: We offer several levels of sponsorship. Financial support will fund implementation of our international projects.
- **Mentorship**: Help our members develop leadership, team-building, and technical skills necessary for our projects. Corporate sponsors may donate employee time for project assessments and implementations.
**Star Sponsor**  
$10,000 or greater  
- Invitation to present on industry and company at EWB-OSU general meetings and EWB-OSU board meetings.  
- Special recognition at all EWB-OSU promotional activities including fundraising events.  
- Recognition in press releases and publications  
- Company logo and or name predominately displayed on all EWB-OSU promotional materials including T-shirts, newsletters, and brochures.  
- Company logo, name, and website link attached to the EWB-OSU website.  
- Company logo displayed at weekly general meetings and club events.  
- Distribution of promotional materials to all students and professional members.  
- Free admission into the Annual Banquet and all EWB-OSU promotional events.  
- Exclusive networking opportunities with the students and engineers apart of EWB-OSU

**General Sponsorship**  
$10,000 or less

**Platinum Level**  
$5,000 or greater  
- Invitation to present on industry and company at EWB-OSU general meetings and EWB-OSU board meetings.  
- Recognition at all EWB-OSU promotional activities including fundraising events.  
- Company logo and or name on all EWB-OSU promotional materials including T-shirts, newsletters, and brochures.  
- Company logo, name, and website link attached to the EWB-OSU website.  
- Distribution of promotional materials to all students and professional members.  
- One free table at the annual banquet.

**Gold Level**  
$2,500 or greater  
- Recognition at all EWB-OSU promotional activities including fundraising events.  
- Company logo and or name on all EWB-OSU promotional materials including T-shirts, newsletters, and brochures.  
- Company logo, name, and website link attached to the EWB-OSU website.  
- Three seats at the annual banquet.

**Silver Level**  
$1,000 or greater  
- Company logo and or name on all EWB-OSU promotional materials including T-shirts, newsletters, and brochures.  
- Company logo, name, and website link attached to the EWB-OSU website.

**Bronze Level**  
$500 or greater  
- Company logo and or name on all EWB-OSU promotional materials including T-shirts, newsletters, and brochures.
